This opportunity in a nutshell

The Ministry of Education (the Buyer) is calling for potential sponsors to register their interest in establishing a Partnership School|Kura Hourua (Partnership School or PSKH) to open in 2019.

This is the fifth application round for Partnership Schools. There are ten (10) partnership schools currently in operation. A fourth procurement round is nearing completion, and that is expected to see further partnership schools opening in 2018.

In this fifth application round, the focus will be on sourcing Science, Technology, Engineering and Mathematics (STEM Education) Partnership Schools|Kura Hourua. If suitable STEM-focussed applications are not received, then the focus will continue to be on applications with a focus on priority learners. Given the level of funding available and the fact that this is the first application round with a focus on STEM Partnership Schools, it is considered likely that a mix of STEM and priority learner schools will be selected to proceed to the full application stage.

The Ministry is therefore seeking applications in relation to two different types of Partnership School:

1. STEM schools will use innovative pedagogy, curricula or school structures to engage students in one or more of the following subjects: Science, Technology (including digital technologies), Engineering and Mathematics. STEM Schools will be required to demonstrate how they will deliver more science, technology, engineering and maths competent learners and encourage more students to choose STEM educational and career pathways.
2. Schools focused on raising achievement among priority learners, i.e. those who have been identified as historically not experiencing success in the New Zealand schooling system, including Māori, Pasifika, students with special education needs and students from low socio-economic backgrounds. It is expected that 75% of enrolments will be priority learners. These schools are referred to as “priority learners” through this document.

Subject to this process, it is estimated that there is sufficient funding for about eight new Partnership Schools sourced from application rounds 4 and 5. Applicants interested in being either a STEM or priority learner partnership school are encouraged to register their interest.

Potential sponsors will need to specify which category of school they are seeking to apply to open. The funding, performance standards and requirements around the enrolments differ for each type (refer to the table at 2.7(iii)). Therefore, a separate Response Form is required for each type of school.

Key Process Information

This is a two-stage application process.

At this first stage, the Expression of Interest (EOI), we will shortlist Applicants based on information in the attached response form.

The second application stage (Request for Application stage) will test all key elements of each application including (but not limited to) more in-depth information on the sponsor, the educational plan (e.g. curriculum, enrolment plans, intended premises, school operations), school leadership and teacher quality, implementation plans and financial viability, including confirming proposed sources of private sector and community support and funding.

Those entering into this process need to be aware that there is a large amount of work involved in preparing a full, well-articulated partnership school application that meets all the criteria, and there is limited time available to do this. Please note that for organisations shortlisted following the EOI

stage, we require the full application to be completed by the end of April. Examples of previous applications can be found at:

SECTION 2: Our Requirements

2.1 Purpose

This Expression of Interest (EOI) process is the fifth application round for partnership schools, and is for schools opening in 2019.

This fifth round of PSKH seeks to source two types of school:

1. STEM schools will use innovative pedagogy, curricula or school structures to engage students in one or more of the following subjects: Science, Technology (including digital technologies), Engineering and Mathematics. STEM Schools will be required to demonstrate how they will deliver more science, technology, engineering and maths competent learners and encourage more students to choose STEM educational and career pathways.
2. Priority learners: focused on raising the achievement among priority students who have been identified as historically not experiencing success in the New Zealand schooling system. PSKH were charged with a targeted response to education underachievement in disadvantaged areas. It is expected that 75% of enrolments will be from priority learners – Māori, Pasifika, students with specialist education needs and students from low socio-economic backgrounds.

This is the first time the Ministry has sought applications in relation specifically to STEM schools. Applicants are able to apply for either of these types of school. Without limiting its discretion, the Ministry has a preference for STEM schools in this EOI for this application round. Given the level of funding available and the fact that this is the first application round with a focus on STEM Partnership Schools, it is considered likely that a mix of STEM and priority learner schools will be selected to proceed to the full application stage.

2.2 Background

In 2012, Cabinet established Partnership Schools I Kura Hourua (PSKH or partnership school) as a new type of school in our education system. The Partnership School model extends the schooling options available for parents and students.

The model enables sponsors (refer to definition at 2.4) to operate a school with greater freedom and flexibility to innovate to enable them to provide high-quality educational outcomes. In exchange for the greater freedoms, there are rigorous performance-related accountabilities for the sponsors who operate the schools.

As at February 2017, three Requests for Application selection rounds have been completed. There are ten PSKH operating in New Zealand with over 1,000 students. A fourth application round is nearing completion and successful Applicants from round four are expected to open their schools in 2018.

2.3 What is a Partnership School?

Unlike regular state schools, whose relationship with the Crown is based on regulation, Partnership Schools are accountable to the Crown through a binding, legally enforceable, fixed-term contract to meet specific and measurable performance goals.

In exchange for committing to achieving these goals, the schools have greater flexibility with regard to school organisation, employment arrangements, curriculum, and teaching methods and practices.

This flexibility is intended to allow the schools to use fresh, innovative ways to engage with students and enable them to succeed.

This also allows the schools to be based on partnerships with communities and community organisations, iwi, whānau/families, philanthropists, businesses and not-for-profit organisations. Schools may be secular or faith-based.

Partnership Schools are resourced under a funded model (employment arrangements, resourcing, school organisation, teaching methods and practices, curriculum, and buildings). This gives the provider significant flexibility as to how resources are deployed compared to other state-funded schools. Educational performance is the most critical aspect of the performance regime.

Further information on Partnership Schools can be found on the Ministry of Education's website at: <http://partnershipschools.education.govt.nz/>

The Partnership Schools legislation (the Education Amendment Act 2013) describes the Partnership School policy's intent and how the partnership schools legal framework differs to that of State schools.

2.4 Sponsors

Successful Applicants (if any) at the end of the two-stage application process, will be considered for approval by the Minister of Education to become the sponsor of a Partnership School.

The term 'sponsor' is used in the wider sense of giving backing to the project and being responsible for delivering outcomes. It is the legal name of the entity that the Minister approves to operate the Partnership School and is the counter-party to the contract with the Government.

The sponsor must be a 'body' such as an incorporated board or trust, company or other legal entity. We welcome applications from organisations from a range of backgrounds including education providers, businesses, iwi, community organisations, faith-based groups, and culture-based educational organisations.

Due to recent changes in legislation TEIs (Tertiary Education Institutions) are now able to be approved as a sponsor of a Partnership School.

Existing private schools seeking to convert to a Partnership School are not eligible to apply in this application round.

2.5 Key values of a Partnership Schools

The key values of the Partnership School/Kura Hourua model include:

- a) how effectively a group proposes to use the flexibilities of the Partnership Schools model and how well the Applicant demonstrates that it will provide learning pathways for its students into future education (should the student choose it)
- b) partnerships with community and other organisations
- c) accountability to meet agreed standards including student achievement
- d) focus on educational performance rather than facilities and property
- e) increased flexibility to decide how to operate and use funding, and
- f) high trust between the Minister/Ministry and sponsors in order to achieve the agreed outcomes.

2.6 Government's Expectations

Sponsors operating Partnership Schools are expected to be either:

- a) STEM focused: (science, technology, engineering and/or mathematics) education to deliver more science, technology, engineering and/or maths competent learners and encourage more students to chose STEM educational and career pathways; or
- b) Priority learner focused: focused on raising the achievement among priority students from groups who have been identified as historically not experiencing success in the New Zealand schooling system. PSKH were charged with a targeted response to educational underachievement in disadvantaged areas. It is expected that 75% of enrolments will be from priority learner groups – Māori, Pasifika, students with specialist education needs and students from low socio-economic backgrounds.

The above are in addition to the expectations that Partnership Schools will:

- a) engage effectively with parents, family/whānau and communities to support and contribute to achieving high educational outcomes for their children
- b) use the freedoms available through this model to lift the educational performance of students
- c) deliver high-quality educational programmes with a strong focus on performance
- d) meet specified performance standards agreed with the Crown, including student academic achievement, and
- e) have strong governance and the organisational capacity and capability required to ensure the high-quality management and operation of the school.

Applicants will need to demonstrate during the application process (in this EOI and, if shortlisted, in further detail in the Request for Application stage) that they have the capability to meet all of these expectations.

2.7 Types of Partnership School sought in Round 5

The Ministry is seeking applications in relation to two different types of Partnership School:

i) STEM Partnership Schools

STEM schools will use innovative pedagogy, curricula or school structures to engage students in one or more of the following subjects: Science, Technology (including digital technologies), Engineering and Mathematics.

STEM Schools will be required to demonstrate how they will deliver more learners competent in science, technology, engineering and maths and encourage more students to choose STEM educational and career pathways.

ii) Priority Learner Partnership Schools

Priority learner partnership schools are focussed on raising achievement among priority students from groups who have been identified as historically not experiencing success in the New Zealand schooling system.

Priority learners are defined as Māori, Pasifika, those students with special education needs and/or students from low socio-economic status backgrounds.

It is expected that priority learner partnership schools will maintain a school roll with at least 75% of students drawn from priority learner groups.

iii) Summary of key differences:

	STEM Partnership Schools	Priority Learner Partnership Schools
Focus	Focus on STEM subject with objective of delivering STEM-competent learners ready to enter STEM career pathways	Improving educational outcomes for priority learners
Indicative Performance Standards	Yet to be agreed, but the Government expectation is that these will be set to a higher standard than priority learner schools	For Secondary, aimed at achieving 85% of Level 2 students at NCEA For Primary, aimed at achieving 85% of students at or above national standards or Ngā Whanaketanga Rumaki Māori (NWRM)

Subjects	Must have a focus on one or more of: Science, Technology (including digital technologies), Engineering and Mathematics	Not prescribed. Although expectation is that students at NCEA level would have access to a broad range of choices
Student Enrolments	No parameters around the students enrolled	Must have at least 75% of enrolments from priority learner groups

2.8 Contract term

We anticipate that the initial Contract Term will be for a period of 6 years, plus an agreed establishment period.

There will be a further two rights of renewal of six years each, at the Minister's discretion.

The table below provides indicative payments that will be available to successful round 5 Sponsors operating priority learner partnership schools. More specific information will be provided in the Request for Application. STEM partnership schools have their operational funding calculated based on a decile 5 school and are anticipated to receive approximately between 1 and 2% less operational funding than priority learner partnership schools.

Note: The information in this section 2.10 is provided for information purposes and is subject to change. It cannot be relied upon by Applicants.

SECTION 3: Our Evaluation Approach

The PSKH Authorisation Board (the Board), supported by the Ministry of Education, will assess the EOIs and determine which Applicants should be invited to submit full applications.

3.1 Evaluation model

The evaluation model that will be used to shortlist Applicants' expressions of interest is a weighted attribute (weighted criteria) model.

The Partnership Schools Authorisation Board, supported by officials from the Ministry of Education will evaluate the responses and shortlist the responses following the following process:

1. Ministry of Education officials will review applications for compliance and conformance with the requirements of the EOI.
2. Ministry of Education officials will support the Authorisation Board by evaluating and providing a preliminary scoring of the expression of interest responses.
3. The Authorisation Board will review the analysis and preliminary scores provided by the Ministry, alongside their own independent assessments to confirm or amend the preliminary scores provided. A justification will be recorded for any changes to preliminary scores.
4. If required, clarification questions will be asked of the Applicants and information provided to the Authorisation Board and/or Ministry of Education.
5. The Ministry of Education and/or the Authorisation Board may take into account the response to any section of the Registration Response Form in its evaluation of other criteria or for conducting due diligence.
6. The Authorisation Board scores will be finalised and the weighting will be applied.
7. The Authorisation Board, with reference to the final weighted ranked list, the focus on STEM schools and the matters stated at clause 4.7, will determine the short-list of organisations to be invited to submit a full application.
8. The Authorisation Board will recommend a shortlist depending on the quality of the applications following a two step process:
 - a) Step 1: The Authorisation Board will first consider STEM schools applications and shortlist those it considers to be of a suitable standard for short-listing using the factors identified at clause 4.7;
 - b) Step 2: (if there is considered to be an insufficient number of STEM applicants recommended for short-listing) consider applications for priority learner schools for short-listing using the factors identified at clause 4.7.The Authorisation Board may take the quality of priority learner schools into account in determining the level required for short-listing of STEM schools.

9. A senior Ministry of Education official will receive the Authorisation Board's recommendation of the shortlist, and with reference to the process and the recommended outcome, endorse proceeding to the next stage.

3.2 Evaluation criteria

Responses will be evaluated on their merits according to the following evaluation criteria and process.

The following evaluation criteria and weightings will be applied:
